SUMMARY

BCA student with experience in building web applications and real-time systems using JavaScript, Python, and Firebase. Developed an IoT-based monitoring system with a web dashboard and live data integration. Looking for an opportunity to contribute to full-stack development and build practical, scalable software solutions.

SKILLS

Languages: Python, Core Java

Frontend: HTML, CSS, JavaScript, Tailwind CSS

Backend: Node.js, Express.js

Database: MySQL, Firebase

Tools: Git, GitHub, VS Code

Microsoft Office: Excel, Word, PowerPoint

PROJECTS

Inventory Management System | Full Stack Web Application | Node.js, Express.js, MySQL, JWT, Tailwind CSS
GitHub Repository | Live Demo

- Developed a secure inventory management platform enabling efficient tracking of products, suppliers, and stock transactions
- Implemented RESTful APIs with Node.js, Express.js, and MySQL, supporting CRUD operations and JWT-based authentication
- Built a responsive dashboard with inventory analytics, low-stock monitoring, inventory valuation, and transaction history
- Enhanced user experience through real-time updates, search and filtering, toast notifications, and responsive mobile design

Smart Agriculture Monitoring System | IoT, NodeMCU, Firebase, JavaScript

GitHub Repository | Live Demo | Demo Video

- Built an IoT-based system using DHT11 and soil moisture sensors to collect real-time environmental data
- Integrated Firebase Realtime Database for live data synchronization between hardware and web interface
- Developed a web dashboard to monitor temperature, humidity, and soil conditions in real time
- Implemented alert functionality to notify users of critical environmental changes

EDUCATION

Bachelor of Computer Applications (BCA)

KES Shroff College, Mumbai | 2026 | CGPA: 8.29

HSC – 87.50% | Viva College, 2023

SSC – 75.80% | Kumari Vidya Mandir, 2021

CERTIFICATIONS

- Project Management – NPTEL (2025)
- Generative AI and Prompt Engineering (2024)
- Statistical Tools in Research (2024)
